Risograph EZ 220

Features

RISO i Quality System™: The RISO EZ220 is equipped with the RISO i Quality System. Two-way communication between RISO Quality System- equipped printers and their supplies is made via integrated RF (Radio Frequency) tags. These tags relay information to the printer, assuring optimum first print quality and superior output throughout the entire job.

Front operation: Thoughtful design makes it simple to change colors and refresh supplies in the EZ220. The printer's front section opens wide and the master making unit pulls out like a drawer, allowing easy placement of a fresh master roll.

Energy saving mode: Energy savings are built in to the EZ220! Energy Saving Mode lowers running costs by automatically turning the printer off or placing it in sleep mode after a user-selected period without operation. Choose from 5, 15, 30, 60, or 90-minute periods without operation before the printer turns off or enters sleep mode.

Riso EZ220 Control Panel

The "Main" panel consists of hard keys for functions including mode selection (i.e. master making and printing), quantity selection, proof print and adjustments to speed, print density and print position. It also features a graphical representation of the unit with numbered areas where problems could occur.

The "Sub" panel, which is inset on the left portion of the control panel, features soft keys for functions including reduction/enlargement, image type (i.e., Line, photo, text/photo), ink-save mode and confidential mode
